## ABOUT THE CONFERENCE

The objective of this conference is to hold an open deliberation on the innovations in Civil Engineering systems and to make a firsthand assessment of the existing challenges with an ambition to arrive at prospective solution and define future strategy. These kinds of dynamic discussions will not only help us explore the changes shaping the profession today and in the future but also kindle the thoughts thereby refining our thinking process towards sustainable society. Civil Engineers with enhanced skills and knowledge are needed to interact with multi-national teams spanning cultural boundaries about global socio-technological problems. The National Conference provides opportunity for academicians, students, and researchers to meet and share their contributions to the Civil Engineering profession, guide the future of the profession. The conference aims to create a platform for Civil Engineers and Research Scholars to express and share their thoughts on innovative technological trends in Structural Engineering, Concrete Technology, Environmental Engineering, Geotechnical Engineering and Transportation Engineering. With the Global problem of reduction in resources it is of utmost importance to develop new and sustainable technologies for helping create a better world. The conference will feature invited talks and referred paper presentations. The vision of this National Conference is to serve as a platform for interaction among researchers and practitioners working in a wide variety of areas in Civil Engineering with a common interest.
