CIT-SAF

TWO-DAY WORKSHOP ON CYBER SECURITY

30 – 31, JANUARY 2014

The Department of Computer Technology & Applications, Coimbatore Institute of Technology, Coimbatore jointly with Sahyog Arunodaya Foundation, organized a two day workshop on “Cyber Security” during 30-31, January 2014 at Coimbatore Institute of Technology, Coimbatore.

The aim of this workshop is to create awareness on Cyber Security in general and in specific train the Faulty members who will support and groom the students in their academic success to become next generation Cyber Security Professionals for India. The resource Persons of the workshop are Mr.Sundaram Hariharan, President, SAF, Mr.Balaji Venkesteshwar, Chief Mentor, SAF, and Mr.Uday Kumar, Chief Mentor (Application Security), SAF.

A talk on “Cyber Security Awareness” by Mr. Balaji Venkateshwar not only created an awareness among the students and the faulty on the Security risks on cyberspace, but also helped to identify the avenues for the students employability and research opportunities to the faculty members.

The technical sessions on “Application Security” by Mr. Udhay Kumar and “Cloud Security” by Mr. Balaji Venkateshwar were very informative. Mr. Udhaykumar, through a demonstration, helped the participants to visualize the use of tools to develop Application securities.
Quantifying security on the IT-chain

- But let’s make this a little more complex by introducing the supply chain.
- Regulators
- 
- There is a conspicuous gap concerning addressing security across the entire IT-chain.
- This presents:
  - Involved stakeholders from dealing with the security provider services in a transparent manner.
  - Competition between Service Providers based on security.
  - And the creation of trustworthy IT ecosystems.
